

Special Issue

Challenges in Emergency Medicine

Message from the Guest Editors

This Special Issue focuses on emergency medicine as a multidisciplinary field, addressing the assessment, management, and outcomes of acutely ill and injured patients. It aims to encompass a broad spectrum of topics, including care of adult and pediatric patients in both in-hospital and prehospital settings, triage and the prioritization of care, patient flow and crowding management, interprofessional collaboration, and care of the critically ill. Additionally of interest are the following: resuscitation and post-resuscitation management, follow-up and outcome evaluation after resuscitation, the management of intoxications, emergency surgical and procedural interventions, care of frail and elderly patients and preparedness and response to mass casualty incidents. In addition, this Special Issue seeks to address organizational and system-level aspects of emergency care, It also aims to highlight the role of digitalization and emerging technologies, financial and economic aspects, and the delivery of emergency care in remote and rural settings, including smaller, dislocated outpatient units. Diagnostic and procedural advances in emergency medicine, will also be covered.
