Advances in the Diagnosis and Treatment of Skin Cancer

Message from the Guest Editors

Advances in imaging techniques, such as dermatoscopy, confocal microscopy and total body photography, have significantly enhanced the early detection of skin tumors, leading to improved patient outcomes. In concordance, novel immunotherapeutic combinations and targeted agents have revolutionized the treatment landscape of both melanoma and keratinocyte skin tumors (including basal and squamous cell carcinoma), offering patients more effective treatment options. Furthermore, the integration of clinical and histological factors into nomograms has enabled the provision of personalized care for patients. This Special Issue seeks to highlight new research, innovative techniques, and emerging trends in the field. We are particularly interested in submissions that address topics such as early detection methods, advanced imaging techniques, novel therapeutic approaches, biomarkers and personalized medicine. We encourage researchers, clinicians, and healthcare professionals from around the world to submit their original research articles, reviews, and meta-analyses to this Special Issue for consideration.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
