

Special Issue

Preventive, Diagnostic and Therapeutic Strategies for Abdominal Surgery Complications (Second Edition)

Message from the Guest Editor

Surgery is indicated to cure or palliate numerous physical ailments, with millions of operations being performed each year worldwide. While the overall risk of complications is low because of the presence of trained and skilled surgeons and the adaptation of good surgical techniques, complications can still occur even with the most experienced of surgeons or in the simplest of cases. Complications can be more or less severe; can resolve spontaneously or require medical, interventional or surgical treatment; and can be specific to the operation performed. However, all of them are significant for the patient and are usually the most difficult part of their management. Prompt and early diagnosis of complications and adequate and proper treatment are the cornerstones in their successful management. After the success of the [first edition](#), a second edition of that Special Issue is in production. It will continue focusing on preventive, diagnostic, and therapeutic strategies for abdominal surgery complications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
