

## Special Issue

# Current Trends and Future Challenges in Heart Failure

### Message from the Guest Editors

Heart failure (HF) remains a prominent cause of morbidity, mortality, and healthcare resource utilization globally. Its prevalence continues to escalate due to an aging population and the increasing incidence of comorbidities such as hypertension, diabetes, and obesity. Despite significant advancements in diagnostic tools and the expansion of guideline-directed medical therapy, heart failure persists as a substantial and public health challenge.

This Special Issue intends to furnish a comprehensive overview of the evolving landscape of HF. Topics slated for inclusion in this issue encompass emerging pharmacologic and advanced device-based therapies, the diagnosis and treatment of cardiac amyloidosis, inflammation-targeted therapies, and precision-driven strategies.

Particular emphasis will be placed on enduring gaps in care, which include multidisciplinary approaches, the management of HF with preserved ejection fraction, cardiorenal syndrome, frailty, and exercise rehabilitation.

We invite original research articles and reviews to promote interdisciplinary collaboration and enhance patient-centered care, inform both clinical practice and research innovation in the management of HF.

---

### Guest Editors

Dr. Oren Caspi

The Heart Failure Unit, Department of Cardiology, Rambam Health Care Campus, Haifa, Israel

Dr. Robert Zukermann

Cardiology Division, Rambam Health Care Campus, Haifa, Israel

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
