Clinical Diagnosis and Management of Vestibular Disorders

Message from the Guest Editors

Dizziness and vertigo are one of the most common symptoms in medicine. The lifetime prevalence of vertigo in the general population in the world is high, ranging from 13–30%. The prevalence increases significantly with age, and the frequency is two to three times higher in women than in men. Vertigo is becoming a significant public health problem because it reduces people's ability to work, leads to a decline in health-related quality of life, and can cause depression or anxiety. The treatment of vestibular disorders can be divided according to different criteria in several ways. One of the practical/didactic divisions related to the treatment of vestibular disorders is one that talks about what the treatment affects, and it is divided into three categories: causal (specific action on a specific cause of the disease), symptomatic (treating various symptoms of the disease), and rehabilitative (aimed at promoting recovery). This Special Issue will identify and bridge gaps in the diagnosis and management of vestibular disorders based on a combination of original research and review papers.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
