

## Special Issue

# Innovations in Head and Neck Surgery

### Message from the Guest Editors

The field of head and neck surgery continues to encounter and benefit from new technologies, with the aim of obtaining more patient-specific treatments. Most of these new techniques are based on virtual surgical planning. This can help surgeons in defining a virtual surgical resection of huge tumors or complex anatomical structures in order to perform a safer oncological resection. It allows also for the design and fabrication of personalized devices, such as cutting guides, prostheses or surgical splints, using 3D-printing technology. Current results concerning the application of innovative technologies in head and surgery are encouraging. The majority of them concern head and neck reconstruction, showing better accuracy and improvements in morphology and functional outcomes compared to those using traditional techniques. Improvements in head and neck surgery are continually progressing, especially considering the latest innovations in medicine, such as robotic surgery, augmented reality and artificial intelligence. This Special Issue aims to explore the applicability and outcomes of innovative technologies in head and neck surgery.

### Guest Editors

Prof. Dr. Achille Tarsitano

1. Maxillo-Facial Surgery, Department of Biomedical and NeuroMotor Sciences, University of Bologna, Bologna, Italy
2. Head of Oral and Maxillo-Facial Surgery Unit, IRCCS Azienda Ospedaliero-Universitaria di Bologna, Bologna, Italy

Dr. Giovanni Badiali

Department of Biomedical and Neuromotor Sciences, Alma Mater Studiorum, University of Bologna, Via S Vitale 59, 40125 Bologna, Italy

### Deadline for manuscript submissions

closed (25 March 2026)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
