What's Going on beyond the Corner in the Treatment of Sepsis?

Message from the Guest Editor

Since the end of the last century, intensivists have relied on guidelines periodically issued and updated by the Surviving Sepsis Campaign to treat critically ill sepsis patients. These guidelines are prepared based on the results of randomized controlled trials performed in the preceding years that involved thousands of patients, and each recommendation is graded according to the robustness of the gathered data. Therefore, the guidelines are already at risk of obsolescence when they are issued. As many innovative investigations in the field of sepsis are currently underway, we find it useful to present and discuss possible future developments in the field of sepsis.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
