Advances in the Diagnosis and Treatment of Pulmonary Sarcoidosis

Message from the Guest Editor

The lung is the most common organ involved with sarcoidosis. Pulmonary sarcoidosis is responsible for most of the morbidity and mortality from the disease. Despite the fact that pulmonary sarcoidosis is one of the most common forms of diffuse lung disease, there is currently no universal agreement on the diagnostic approach, treatment algorithm, or methods with which to monitor this condition. This Special Issue of the *Journal of Clinical Medicine* focuses on the diagnosis and treatment of pulmonary sarcoidosis. World experts on pulmonary sarcoidosis have compiled a series of articles encompassing the varied clinical aspects of the disease. It is hoped that this Special Issue will be a valuable resource for clinicians that will improve the care of pulmonary sarcoidosis patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
