Hemorrhagic Stroke: Diagnosis, Treatment and Management

Message from the Guest Editors

Hemorrhagic stroke (intracerebral hemorrhage, subarachnoid hemorrhage) accounts for only 20% of all strokes, but the high mortality and long-term disability rates associated with it makes it a very important topic in clinical practice. Hemorrhagic stroke is an important part of the daily clinical work of neurosurgeons, stroke neurologists, neuro-intensivists, and neuroradiologists. Despite tremendous progress having been made over the past three decades in the treatment, diagnosis, and management of hemorrhagic stroke, many unanswered questions remain. Among the many causes stand primary cerebral hemorrhage, cerebral aneurysm, cerebral arteriovenous malformation, cavernous tumor, and dural arteriovenous fistula, to name a few. This Special Issue of *JCM* aims to collect contributions from all aspects related to the diagnosis, treatment, and management of hemorrhagic stroke. Original research articles, case reports, short communications, and reviews are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
