Emerging Treatment Options for Skull Base Tumors and Related Diseases

Message from the Guest Editor

Skull base tumors and related diseases refer to a group of conditions characterized by the growth of abnormal cells or tissues in the skull base region. These tumors can arise from various structures, including the bones, nerves, blood vessels, and connective tissues of the skull base. Skull base diseases represent a complex and challenging interdisciplinary field, where the modern approach to diagnosis, imaging and therapy involves an interdisciplinary team of neurosurgeons, otorhinolaryngologists, head and neck surgeons, neuroradiologists, and radiation therapy specialists. Currently, significant progress has been made in the diagnosis and treatment of skull base tumors and related diseases. However, the treatment of skull base tumors and related diseases remains challenging due to their location near complex and vital structures. Early diagnosis, personalized treatment, and long-term follow-up are crucial for the prognosis of patients. This Special Issue welcomes submissions of relevant reviews, literature reviews, perspectives, and clinical research manuscripts.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
