Acute Hypoxemic Respiratory Failure: Progress, Challenges and Future

Message from the Guest Editors

We are planning a Special Issue on acute hypoxemic respiratory failure (AHRF) in *JCM*. AHRF is a heterogeneous syndrome encompassing conditions like ARDS, acute lung injury, and hypoxemia from sepsis, trauma, or viral infections (e.g., COVID-19). We seek submissions that bridge evidence and bedside care, exploring critical questions. All of the most important topics spanning protective, infection, imaging, hemodynamic, and artificial intelligence fields will be considered. This Special Issue aims to bridge translational gaps and foster multidisciplinary solutions to address challenges in AHRF. We are looking forward to your submissions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
