Thyroid Disease: Updates from Diagnosis to Treatment

Message from the Guest Editors

Thyroid disorders are frequently encountered in clinical daily life. Laboratory tests and imaging procedures are integral to the diagnosis and management of thyroid disease. An appropriate integration of laboratory, imaging and (cyto)pathology data is pivotal for refining the diagnosis and selecting patients for different available therapies. In addition, radioiodine (i.e., I-131) therapy was the first application of the theranostic approach in clinical practice and is widely used in patients with differentiated thyroid cancer, hyperthyroidism and non-toxic compressive goiter since the 1940s. The present issue aims to provide relevant information on different diagnostic methods actionable in thyroid patients and their rationale integration (i.e., integrated diagnostics). Furthermore, surgical, pharmacologic and theragnostic applications for patients with either benign or malignant thyroid diseases will also be illustrated. We invite specialists in clinical thyroidology, endocrine surgery, imaging and theranostics, laboratory and (cyto)pathology to share their experience and contribute with original research and reviews to our present issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
