New Insights in Trauma and Emergency Surgery

Message from the Guest Editors

In recent decades, trauma and emergency surgery have seen remarkable advancements driven by scientific research and clinical innovation. Our scientific understanding of injury patterns, surgical techniques, and the complex needs of our patients following major trauma continues to evolve. Given the broad spectrum of cases in trauma and emergency surgery, there is an increasing need for interdisciplinary treatment strategies. Certain patient groups, such as the elderly, polytraumatized, or those with comorbidities, require individualized treatment plans. This Special Issue focuses on the latest treatment strategies in trauma and emergency surgery aiming to provide a selection of current scientific and surgical recommendations for clinical practice. Therefore, researchers in this field are encouraged to submit an original article or review to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
