Clinical Advances into Oral and Maxillofacial Surgery

Message from the Guest Editor

Innovation in technology for the diagnosis and treatment of head and neck pathologies continues to rapidly progress and increase in quality. Given this, this Special Issue aims to gather clinical studies and reviews on innovation in oral and maxillofacial surgery, with the aim of updating clinicians on the available possibilities of improving therapy quality. In particular, this Special Issue welcomes papers whose aims align with those of Sustainable Developmental Goals 3 (health and wellbeing), 5 (gender equality), and 10 (reduced inequalities).
