New Clinical Advances in Chronic Asthma

Message from the Guest Editor

Chronic asthma is a multifaceted inflammatory disorder of the airways characterized by recurrent symptoms such as wheezing, breathlessness, and coughing. The landscape of asthma management has significantly evolved, with recent advances focusing on personalized treatment strategies, novel biologic therapies, and the concept of asthma remission. Asthma management has traditionally aimed at symptom control and prevention of exacerbations through the use of inhaled corticosteroids (ICS) and long-acting beta-agonists (LABAs). However, a deeper understanding of asthma's heterogeneity has led to more refined, phenotype-driven approaches, with a growing emphasis on disease modification and remission. This Special Issue on chronic asthma gives updates on current clinical research developments. Original research articles and reviews are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
