Geriatric Emergency Medicine: Clinical Advances and Trends

Message from the Guest Editor

An aging population will inevitably lead to a significant rise in healthcare demand, especially in emergency services. The special characteristics of older adults are a great challenge for emergency departments, which must be transformed to provide quality, safe, and efficient care to an aging population. Despite international guidelines and worldwide consensus updates, evidence gaps persist. The aim of this Special Issue is to provide a comprehensive overview of the advances in geriatric emergency medicine, with particular interest in the needs of older patients and opportunities for providing optimal care, clinical advances and trends, models of management, patient safety and wellbeing, and value-based healthcare. Therefore, researchers in the field of geriatric emergency medicine are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
