Advances in Coronary Artery Disease

Message from the Guest Editors

Despite continuous improvements in the diagnostic and therapeutic options, coronary artery disease (CAD) remains one of the most important causes of mortality and morbidity worldwide, with different manifestations, like acute coronary syndromes (ACSs), chronic coronary syndromes (CCSs), and myocardial infarction with non-obstructive coronary artery disease (MINOCA).

Information about physiology, diagnosis, and treatment strategies is required to pursue precision medicine in the field and improve the prognosis of these patients. This Special Issue welcomes submissions about the topic of CAD, from basic science to clinical data, including case reports, original research, and state-of-the-art reviews. We look forward to your submissions!

Guest Editors

Dr. Filippo Zilio

Department of Cardiology, Santa Chiara Hospital, APSS, Trento, Italy

Dr. Jose M Montero-Cabezas

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
