Recent Advances in Therapy of Trauma and Surgical Critical Care

Message from the Guest Editor

In recent years, The intervention of different specialists on the patient creates an opportunity to optimise objectives: "the right patient, to the right place, at the right time, to receive the right care". In this sense, bleeding control protocols, damage control surgery, minimally invasive techniques, and new imaging modalities have become increasingly important in reducing the risk of complications and facilitating earlier mobilisation. This Special Issue aims at providing an update on clinical and technological aspects for professionals involved in the initial critical care of this complex group of patients. Keywords:

- trauma management
- trauma care
- burn
