Cardiovascular Disease in the Era of COVID-19

Message from the Guest Editor

In addition to involving the respiratory system, COVID-19 can also affect the cardiovascular system, causing acute and/or chronic myocardial injuries. COVID-19 patients may present cardiovascular involvement irrespective of the severity of COVID-19 illness. In this Special Issue of *JCM*, we intend to present publications regarding the prevalence of CVD, diagnosis using biomarkers/cardiovascular imaging, validation of treatment and the follow-up protocol. In addition, publications regarding the role of vaccination in the development of cardiovascular disease will be also included. We strongly believe that this Special Issue will clarify questions regarding CVD due to COVID-19, and we invite you to submit your valuable contribution and provide an opportunity to build an exciting and useful issue about CVD in the era of COVID-19. About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
