Difficult Situations and Modern Surgical Techniques in Ventral Hernia Surgery

Message from the Guest Editor

Nowadays, the surgical treatment of ventral hernia represents a continuous challenge. This is mainly due to hernia location (lateral, parastomal), complexity (in relation to the width or to a loss of domain), or to a patient's particular condition (especially obesity). Despite international guidelines and worldwide consensus updates, evidence gaps persist at all points. The aim of this Special Issue is to provide a comprehensive overview of the advances in the treatment of ventral hernia, with a particular interest in the management of patients with obesity, complex localizations, and the use of innovative techniques of preoptimization (botulinum toxin, preoperative pneumoperitoneum) as well as surgical repair (innovative mesh, robotic). Therefore, researchers in the field of abdominal wall repair are encouraged to submit their findings as original articles, surgical techniques, or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
