Recent Developments in Gynecological Endocrinology

Message from the Guest Editor

Gynecological endocrinology is a specific field of modern medicine that focuses on the field of physiological and pathological endocrine mechanisms related to the hypothalamic–pituitary–ovarian axis and also influences other endocrine glands, which have an impact on women’s health and hormonal disorders. At present, gynecological endocrinology must face new challenges arising in the context of etiopathogenesis, diagnosis, differential diagnosis and novel drugs. This Special Issue aims to discuss the recent developments in the pathophysiology, diagnosis and treatment of different disorders in the field of gynecological endocrinology. The topics of interest for this Special Issue include menstrual disorders, hyperandrogenization, puberty and related disorders, fertility and infertility and hormonal disorders during pregnancy, premenopause and menopause. This Special Issue will also cover various hot research topics such as new contraception methods, endometriosis pathophysiology and treatment, functional hypothalamic amenorrhea treatment, premature ovarian insufficiency etiology and management and new advances in menopausal symptom treatments.
