Autoimmune Skin Diseases: Innovations, Challenges, and Opportunities

Message from the Guest Editor

The advent of biologic therapies has transformed the management of common inflammatory skin diseases such as psoriasis, atopic dermatitis, and hidradenitis suppurativa, leading to significant changes in drug utilization. While these treatments have greatly improved patient outcomes, they also present challenges, including an increasing economic burden on healthcare systems. This Special Issue will explore these challenges while addressing specific shifts in healthcare access. Additionally, we will examine novel approaches to photodermatoses, such as solar urticaria and collagen vascular diseases, driven by advances in research on immunopathogenesis. A key focus will also be placed on recent developments in targeted therapies for immunobullous disorders and graft-versus-host disease, opening up new avenues for precision medicine. By integrating research on disease mechanisms, innovative treatment strategies, and healthcare impacts, this Special Issue will foster conversations around optimizing patient care and resource allocation in autoimmune dermatology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
