Urologic Oncology: From Diagnosis to Treatments

Message from the Guest Editors

Urologic cancer research is a dynamic and critical field dedicated to unraveling the characteristics of tumors affecting the genitourinary system. Its primary aim is to develop our understanding in order to improve the management of these complex diseases. Researchers tirelessly explore the intricate genetic and molecular mechanisms underlying the initiation and progression of urological cancers, paving the way for personalized diagnostic and therapeutic strategies. Robotic surgery has become widespread, with it already being a cornerstone in the treatment of many urologic malignancies. Continuous efforts are conducted by scientists to improve the accuracy of diagnostic tools, the efficacy and safety of medical treatments, the outcomes of surgical techniques, and ultimately, the patients' prognosis and quality of life. In this Special Issue, we invite authors to submit papers on the recent advances and future perspectives of epidemiology, risk factors, pathophysiology, and the diagnosis and/or treatment of main urologic tumors.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
