

Special Issue

Endovascular Management of Diseases of the Aorta: From the Aortic Valve to the Iliac Arteries

Message from the Guest Editors

This Special Issue is intended to be a journey through innovations in the endovascular treatment of diseases of the aorta. It should tell the contemporary story and the future of therapeutic strategies for the entire aorta, from the valve to the iliac arteries, without anatomical barriers. Nowadays, endovascular management represents an essential therapeutic tool, especially, but not only, in patients at high surgical risk. Doctors have always tried to develop treatment strategies that are as non-invasive as possible. However, no other progress towards this goal has been quite as spectacular as that of aortic endovascular therapies. Progress as the result of the development of materials, technologies, and devices in the hands of doctors from different backgrounds and cultures has made it possible to create and optimize the most advanced endovascular techniques. We would like to produce a Special Issue with no borders of 'specialization' precisely because we are convinced that only a 'multidisciplinary approach' can serve as a model for a health service that is a 'lighthouse' in these first decades of the 21st century.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
