Clinical Research Progress in Diabetes and Cardiovascular Diseases

Message from the Guest Editor

Diabetes is heavily involved in the development of cardiovascular diseases (CVDs), and the long-term effects of hyperglycemia can cause vascular injury and increase the risk of CVDs such as coronary artery disease and cerebrovascular disease. Hyperglycemia is known to have a wide range of effects on the cardiovascular system, including increased insulin resistance, activation of inflammatory responses, and vascular endothelial dysfunction, and these mechanisms are complicated and entangled, increasing the risk of CVDs. Furthermore, with the spread of treatment guidelines for not only diabetes, but also hypertension and dyslipidemia, there have been reports of a decrease in CVD death and an extension of lifespan in diabetic patients. In this Special Issue, we will be calling for the latest research results on epidemiological research related to the relationship between diabetes and CVDs, new tests for early diagnosis of cardiovascular disorders, and treatments aimed at suppressing CVDs in diabetic patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
