Special Issue

Advances in the Diagnosis and Treatment of Pancreatic Cancer

Message from the Guest Editors

The prognosis for patients with pancreatic cancer is dismal, and surgery is the only chance for a cure. Patients with borderline resectable (BR) and locally advanced (LA) pancreatic cancers were previously not considered surgical candidates, but current combination regimens in the neoadjuvant setting have demonstrated significant clinical responses such that these patients are increasingly undergoing operative resection. Even patients with limited metastatic disease who demonstrate excellent tumor biology may now be considered for locoregional therapies, including pancreatectomy. Advances in surgical techniques and peri-operative care, including increasingly complex resections and reconstructions, minimally invasive approaches, and adjunct therapies such as irreversible electroporation, ablative radiation therapy, metastatectomy, heated intraperitoneal chemotherapy, and others, have broadened the treatment spectrum for this aggressive disease. The goal of this Special Issue is to provide information on novel and innovative approaches to the diagnosis and treatment of pancreatic cancer and better defining of patient selection for advanced therapies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
