

## Special Issue

# Recent Advances in Hypercholesterolemia

### Message from the Guest Editor

Hypercholesterolemia remains a major global contributor to atherosclerotic cardiovascular disease, yet significant gaps persist in early detection, molecular diagnosis, and personalised therapeutic management. New advances in genetic testing, functional characterisation, biomarker discovery, and targeted lipid-lowering strategies are rapidly transforming the field and offer opportunities for more precise risk stratification and management. This Special Issue, “Recent Advances in Hypercholesterolemia”, aims to highlight cutting-edge research addressing these unmet needs. It welcomes contributions spanning clinical genetics, functional studies, epidemiology, implementation science, and precision-medicine approaches to lipid disorders. This Special Issue seeks to advance the understanding of disease mechanisms, improve diagnostic accuracy, and support more effective and individualised therapy. We invite researchers and clinicians to contribute original studies and reviews that will help shape the future of hypercholesterolemia research and patient care.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
