Special Issue

Meibomian Gland Dysfunction and Dry Eye Diseases

Message from the Guest Editors

Meibomian gland dysfunction (MGD) is a leading cause of evaporative dry eye disease and remains a key area of research and clinical interest in the field of ocular surface diseases. Advances in diagnostic imaging, such as non-contact meibography and lipid layer analysis, have enabled the more precise evaluation of meibomian gland structure and function. Moreover, recent progress in understanding the pathophysiology of MGD, including the roles of inflammation, microbial flora, and systemic factors, has contributed to the development of novel therapeutic strategies.

This Special Issue invites original research articles, reviews, and clinical studies focusing on all aspects of meibomian gland dysfunction and dry eye disease, including epidemiology, diagnosis, underlying mechanisms, innovative treatment modalities, and emerging technologies. We welcome submissions that aim to improve the understanding, diagnosis, and management of MGD and dry eye disease, ultimately enhancing patient outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
