Clinical Management of Knee Arthroplasty

Message from the Guest Editor

We are performing a lot of total knee arthroplasty in the last stage of degenerative arthritis. As the lifespan of humans gradually increases, the number of patients suffering from degenerative knee arthritis is expanding, and eventually, the number of patients undergoing artificial knee arthroplasty surgery is increasing.

The overall management of arthroplasty helps one overcome pain, swelling, and motor disorders caused by arthritis, leads one's daily life, and maintains one's health.

Topics to explore include:

- Overall patient care in knee joint replacement;
- Attention and development directions in surgery in knee joint replacement;
- Clinical attention and management directions in knee joint replacement;
- Defining the limits and disclosing future challenges.

We invite you all to be part of the most basic journey of this orthopedic surgery. Together, let us explore the front lines of knee arthroplasty to redefine the landscape of this field and improve the lives of patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
