

## Special Issue

# Recent Advances in Trauma and Orthopaedic Surgery

### Message from the Guest Editors

It is our pleasure to announce a Special Issue titled 'Recent Advances in Trauma and Orthopaedic Surgery'. In this Special Issue, we welcome publications pertaining to all aspects of clinical orthopaedic surgery. Given the rapid evolution of techniques and clinical knowledge, we will prioritise novel findings that are likely to change orthopaedic clinical practice. In particular, submissions related to trauma, upper/lower extremity and tendon surgery, and infection orthopaedic research are welcome. Please note all study designs will be considered, except from case reports. Your contribution will be highly appreciated as we believe that this Special issue will lead to papers with clinically meaningful conclusions.
