Advances in Affective Disorders

Message from the Guest Editors

Affective disorders continue to be a significant area of investigation, as researchers strive to deepen our understanding of the complex interplay between biological, psychological, and social factors that contribute to these conditions. Current research has witnessed remarkable progress across various domains. Advances in neuroimaging techniques have shed light on the underlying neural circuitry and molecular mechanisms, paving the way for more targeted interventions. Novel therapeutic modalities in the field of psychotherapy, mindfulness-based interventions, and psychopharmacological advancements have shown promise in enhancing symptom management and improving overall well-being. We welcome a diverse range of topics, including novel diagnostic approaches and assessment tools, the exploration of treatment interventions, including pharmacological and non-pharmacological approaches, genetic and neurobiological advancements, comorbidity and its implications for clinical management, and translational and clinical research. I strongly encourage you to submit your original research or review papers to our journal and be a part of our vibrant scientific community.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
