# Minimally Invasive Surgery in Gastrointestinal Disease: Current Status and Future Directions

### Message from the Guest Editors

Minimally invasive surgery (MIS) plays a crucial role in the management of gastrointestinal (GI) diseases, revolutionizing the field of surgical intervention. This advanced technique utilizes small incisions and specialized instruments to access the affected area, reducing trauma and enhancing patient outcomes. In the context of GI diseases, MIS offers numerous advantages. It leads to less postoperative pain, shorter hospital stays and faster recovery times compared to traditional open surgeries. Patients experience an improved quality of life and can resume their daily activities sooner. Moreover, MIS provides enhanced visualization and precision during GI procedures, such as hernia repairs, gallbladder removals and appendectomies. This results in reduced complications and faster healing. The role of MIS in GI disease management continues to expand as technology evolves, providing patients with less invasive treatment options, better outcomes and an overall improved experience.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
