

## Special Issue

# Orthopaedic Issues in Osteoporosis

### Message from the Guest Editor

Osteoporosis can lead to various orthopaedic issues, impacting overall musculoskeletal health and quality of life. Some common orthopaedic problems associated with osteoporosis include: Fractures: The most significant issue associated with osteoporosis is an increased risk of fractures, particularly in the spine, hip, and wrist. Spinal deformities: Osteoporotic vertebral fractures can lead to a gradual collapse of the vertebrae. Hip fractures: Hip fractures are a major concern in individuals with osteoporosis, as they often require surgery and can lead to long-term disability, loss of independence, and increased mortality. Wrist fractures: Osteoporotic fractures at the wrist are common and can limit hand function and mobility. Chronic pain: Fractures and microfractures in osteoporotic bones can lead to ongoing pain and discomfort, affecting daily activities and overall quality of life. Management of orthopaedic issues in osteoporosis involves treating existing fractures, preventing future fractures, managing pain, and optimizing bone health. This may include medications, physical therapy, lifestyle modifications, and, in some cases, surgery.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
