Clinical Diagnosis and Treatment of Gynecologic Oncology

Message from the Guest Editors

Today, the multidisciplinary management of patients with gynecological cancers represents a continuous challenge. This is mainly due to the two main outcomes for this subset of patients: survival, related to adequate and radical treatment, and quality of life, linked to the chance to be submitted to minimally invasive surgery that aims to preserve the reproductive and hormonal functionality of young patients and reduce postoperative morbidity. The development of treatment pathways aimed at maintaining a good quality of life and fertility for young patients is still investigated and debated today. Even postmenopausal patients can benefit from the use of less invasive surgical techniques and medical therapies. The aim of this Special Issue is to provide a comprehensive overview of the advances in the diagnosis, prognostic stratification, and treatment of gynecologic oncologic patients. Therefore, researchers in the field of gynecologic oncology, surgical oncology, and reproductive medicine are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
