Recent Progress and Future Directions of Interventional Cardiology

Message from the Guest Editor

From the first percutaneous coronary intervention (PCI) by Andreas Grüntzig in 1977 to patients undergoing robotically assisted PCI within the EVOLUTION study in 2023, interventional cardiology has seen many technical and clinical innovations. We are now well able to tailor physiology and intravascular-imaging-guided interventions to individual needs and to improve patient outcomes following evidence-based algorithms. Alain Cribier's first transcatheter aortic valve implantation in 2002, followed by the PARTNER and EVOLUT trials, established TAVI as the standard of care in high-risk patients with severe aortic stenosis. With growing evidence of the good performance of TAVI-prostheses in intermediate and low-risk patients, advancements towards future trials such as the EXPAND II trial will show whether or not early intervention may further improve patient outcomes. With more and more devices for the treatment of tricuspid and mitral valve disease, the "winner of the race" is yet to be defined.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
