

## Special Issue

# Advances in Clinical Practice and Personalized Approaches in Cardiovascular Disease—2nd Edition

### Message from the Guest Editors

We are pleased to announce this Special Issue, “Advances in Clinical Practice and Personalized Approaches in Cardiovascular Disease—2nd Edition”, which we are launching as a result of the success of the first edition, in which we published 10 papers. For more details, please visit [https://www.mdpi.com/journal/jcm/special\\_issues/3IV66I28J9](https://www.mdpi.com/journal/jcm/special_issues/3IV66I28J9).

This Special Issue will address emerging challenges and innovations in the management of cardiovascular disease, with a focus on advancing clinical practice through personalized approaches. As cardiovascular disease remains a leading cause of mortality worldwide, there is an urgent need for tailored interventions that account for individual patient variability.

For this Special Issue, we invite original research articles and reviews that explore personalized diagnostics, therapeutic strategies, and preventive measures in cardiovascular care. The scope includes novel biomarkers, cutting-edge imaging techniques, patient stratification methods, and advancements in pharmacotherapy to enhance treatment plans.
