New Insights in Cognitive Aging and Mild Cognitive Impairment

Message from the Guest Editors

Cognitive aging is one of the greatest challenges people face during the aging process. Cognitive deterioration is considered normal in the aging process to some degree; however, clinical manifestations of cognitive impairment, such as mild cognitive impairment (MCI), may affect functional ability and thus require attention. The aim of this Special Issue, “New Insights in Cognitive Aging and Mild Cognitive Impairment”, is to explore cognition among older adults, from its conceptualization and measurement to longitudinal analysis and recently developed intervention strategies. We welcome contributions that incorporate a multidisciplinary approach and embed cognition within the broader context of aging. Likewise, scientific contributions focusing on the particularities of cognitive ability measurement in late adulthood and differences among distinct measurement approaches are also welcomed. We look forward to your valuable contributions and to collectively advancing research and clinical practice in the field of cognitive aging.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
