

Special Issue

Cognitive Decline and Dementia: Physical, Cognitive and Mental Health in Older Adults

Message from the Guest Editors

Cognitive impairment is considered a public health problem due to its high prevalence, the socioeconomic burden it causes and the impact it has on patient quality of life. Cognitive impairment is characterized as a risk factor for the development of dementias that are just as disabling worldwide owing to the association of cognitive function at lower levels with reduced functional capacity, alterations in mood or behavior, and impaired cognitive functions. Hence, it is necessary to study the different associations related to these diseases and to test different strategies that improve the physical, mental and cognitive health of people with cognitive impairment or dementia. This Special Issue of the *Journal of Clinical Medicine* (JCM) will address the current state of the knowledge on the links between cognitive impairment and dementia with the physical, mental and cognitive health of older adults. We are eager to publish original research papers and reviews. Researchers are also encouraged to submit manuscripts studying new approaches to or strategies for the management of cognitive impairment and dementia.

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
