Advances in Pulmonary Rehabilitation

Message from the Guest Editors

Pulmonary rehabilitation is defined as “a comprehensive intervention based on thorough patient assessment followed by patient-tailored therapies that include, but are not limited to, exercise training, education, self-management intervention aiming at behavior change, designed to improve the physical and psychological condition of people with chronic respiratory disease and to promote the long-term adherence to health-enhancing behaviors”. Pulmonary rehabilitation is a highly effective intervention to reduce shortness of breath and improve health status and exercise tolerance in people with chronic obstructive pulmonary disease. There is growing evidence of its positive effects in several outcomes in people with interstitial lung disease, asthma, pulmonary arterial hypertension, lung cancer, cystic fibrosis and other respiratory diseases. In the present Special Issue, the most recent approaches to patient assessment and management as well as optimization of uptake, delivery and completion of pulmonary rehabilitation will be covered.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
