Current Trends and Prospects of Critical Emergency Medicine

Message from the Guest Editor

Emergency medicine as a specialty has seen rapid growth in the past two decades. Emergency medicine has faced many challenges, but we have also encountered more opportunities and advancements, especially in regard to caring for critically ill patients. With staff shortages, many Emergency Departments (EDs) are keeping patients longer in them, which hinders care and affect outcomes for all patients. The “boarding” issue and how to improve patient care in this setting is becoming increasingly important. Emergency medicine has also encountered more opportunities to care for patients, including the widespread adoption of point-of-care ultrasound to evaluate patients’ volume status, right heart strain with Tricuspid Annular Plane Systolic Excursion (TAPSE), and the advancement of Extracorporeal Cardiopulmonary Resuscitation (ECPR) for eligible patients with out-of-hospital cardiac arrest, etc. In this Special Issue, we welcome authors to submit scholarly works that suggest solutions or trends to current issues generally applicable to emergency medicine patients or critically ill patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
