Head and Neck Cancer: Recent Advances and Future Directions

Message from the Guest Editors

Head and Neck Cancer (HNC) encompasses a heterogeneous group of malignancies, arising from the different structures of the head and neck region. Advanced stages of the disease are associated with dramatic consequences in terms of survival and quality of life. Compared to other types of malignancies, in which novel diagnostic and therapeutic strategies have changed the history of the disease, turning incurable diseases into “curable”, in HNC, the reality is different. Many efforts are made to improve survival, but the results are still far from the expectations. In addition, the functional impairment and social impact for the patient are significant, with a poor quality of life reported by most patients treated in advanced disease stages. This Special Issue launches an invitation for researchers and clinicians to share their recent investigations and results in the complex field of HNC research. Original articles, review articles, and communications on the topics of prevention, pathogenic mechanisms, biomarkers, diagnosis, clinical aspects, therapy strategies and prognosis in HNC are within the scope of this Special Issue and are welcomed for submission.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
