New Insights into Management of Chronic Rhinosinusitis

Message from the Guest Editor

The recent introduction of monoclonal antibodies for treating type 2 chronic rhinosinusitis with Nasal Polyps (CRSwNP) has brought renewed attention to chronic rhinosinusitis (CRS) within the scientific community. The advent of agents such as dupilumab and mepolizumab has significantly transformed the management of patients with type 2 CRSwNP, a population previously considered difficult to treat with conventional medical and surgical approaches. Nonetheless, selecting the most appropriate therapeutic strategy remains a complex task, often guided by the clinician's individual experience rather than standardized criteria. At the same time, considerable progress is still needed in the effective treatment of other forms of chronic rhinosinusitis, particularly secondary types such as Eosinophilic Granulomatosis with Polyangiitis (EGPA) and Cystic Fibrosis-related CRS. In this Special Issue, we welcome authors to submit papers on the advances of diagnostic and therapeutic tools for both primary and secondary chronic rhinosinusitis.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
