

Special Issue

Revolutionizing Neurosurgery: Cutting-Edge Techniques and Innovations

Message from the Guest Editor

Neurosurgery is rapidly evolving through a combination of refining traditional techniques and making use of innovative technologies. This Special Issue highlights key advances in this discipline, including microsurgical approaches, minimally invasive techniques, endovascular treatments, and advanced neuroimaging. Conventional microsurgery remains central to the field, with improvements enhancing its precision and safety. Innovations in skull base surgery, aneurysm clipping, and tumor resection continue to optimize patient outcomes. Minimally invasive procedures, such as endoscopic and laser-assisted surgeries, are reducing complications and accelerating recovery. Endovascular techniques for treating aneurysms, AVMs, and stroke offer effective, less invasive options. This collection will contain cutting-edge research into the advancement of neurosurgery, providing essential knowledge for clinicians and researchers dedicated to improving patient care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
