Clinical Diagnostic and Therapeutic Approaches in Cardiac Amyloidosis

Message from the Guest Editor

Cardiac amyloidosis is a progressive and potentially fatal condition characterized by the deposition of amyloid fibrils in the heart, leading to restrictive cardiomyopathy and heart failure. Early diagnosis and targeted therapy are critical for improving outcomes. This Special Issue, "Clinical Diagnostic and Therapeutic Approaches in Cardiac Amyloidosis", aims to provide a comprehensive overview of the latest developments in the diagnosis and treatment of cardiac amyloidosis. We invite contributions that explore a wide range of topics related to cardiac amyloidosis, including original research articles, and reviews. We aim to provide valuable insights that will guide clinicians in improving the diagnosis and treatment of cardiac amyloidosis. Please click [here](#) to find more information.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
