Innovations in Sports Traumatology: Arthroscopy, Ligament Repair, Reconstruction, Regeneration & Rehabilitation

Message from the Guest Editor

Sports traumatology is a fast-growing field in orthopedics, with multiple novel arthroscopic and minimal invasive techniques and procedures evolving over the past decade. Advances in arthroscopy have not only made it possible for us to treat sports-related injuries formerly impossible to treat with open surgery but also helped us to define and discover new pathologies. In sports traumatology, the focus has shifted to anatomic reconstruction and joint preservation via extra-anatomic reconstruction or arthroplasty. Recent developments in the field of regenerative procedures have had a growing impact on treatment strategies for sports-related injuries. As our surgical techniques have evolved to a rather consistently satisfying level in a range of fields, a future challenge in orthopedics will be the encouragement of biologic healing with the use of orthobiologics and tissue engineering. We welcome recent sports-traumatology-related research dealing with innovative arthroscopic procedures, ligament repair, joint reconstruction, regenerative procedures and rehabilitation in this JCM Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
