Diagnosis and Treatment of Pancreatitis

Message from the Guest Editors

As one of the leading acute gastrointestinal diseases, pancreatitis has a significant, negative impact on patients' lives and also causes a significant social-economic burden; sadly, its incidence is rising steadily. An inflamed pancreas could also cause the release of inflammatory cells and cellular damage products that may harm the lungs, kidneys, and heart. The source of pain in pancreatitis is complex and multifactorial, with the relative contribution of different factors varying from patient to patient. This requires clinicians to optimize the general management of these patients by offering new approaches to pain relief and treatment of complications. Our Special Issue, "Diagnosis and Treatment of Pancreatitis", welcomes original contributions focusing on new ideas on clinical management of acute pancreatitis, recurrent pancreatitis, and chronic pancreatitis. We hope that our work could help to provide better treatment for the patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
