# Clinical Advances in Hip and Knee Surgery

### Message from the Guest Editor

Recent advancements in surgical technologies are remarkable, and hip and knee surgeries are no exception. In joint arthroplasty, the clinical usefulness of computer-assisted surgery, represented by robotic surgery, is leading to reliable outcomes. Molecular biological techniques represented by genetic diagnosis are beginning to be applied in the diagnosis of orthopedic biofilm infections as well as COVID-19 infection. Development of motion analysis technology is expected to contribute to the accurate extraction of patient-specific posture and lead to the establishment of screening for musculoskeletal diseases and tailor-made rehabilitation medicine. The development of regenerative medicine is associated with advanced clinical outcomes in hip and knee surgery. Large-scale research data lead to the development of a preventive protocol on venous thrombosis and surgical site infection, which are serious complications in hip and knee surgery. Despite the onslaught of COVID-19, technologies in hip and knee surgeries are making steady progress. Thus, we are calling for a wide range of papers focusing on such advances in hip and knee surgeries.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
