New Advances in Hip and Knee Arthroplasty

Message from the Guest Editor

We are pleased to invite you to contribute to this Special Issue of *Journal of Clinical Medicine*, titled “New Advances in Hip and Knee Arthroplasty.”

Total hip and knee arthroplasty are among the most frequently performed and highly effective orthopedic procedures worldwide. As the global population continues to age and the demand for joint replacement grows in surgical techniques, implant technology, and perioperative management are more important than ever.

This Special Issue aims to highlight recent innovations, clinical outcomes, and evidence-based practices in hip and knee arthroplasty. In alignment with the *JCM*s scope, we welcome submissions that explore robotic-assisted surgery, perioperative care, management of complications, and strategies for revision arthroplasty.

This Special Issue welcomes original research articles and reviews. Research areas may include (but are not limited to) the following:

- Robotics and computer-assisted surgery;
- Perioperative optimization and enhanced recovery;
- Infection prevention and revision strategies;
- Functional outcomes and patient satisfaction;
- Long-term implant survival.

We look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
