Clinical Updates on Atopic Dermatitis Treatment

Message from the Guest Editor

Atopic dermatitis (AD) is one of the common chronic inflammatory skin diseases worldwide, with pruritus as a primary lesion. Although AD is most often diagnosed in childhood, many adults experience the disease even after the age of 18. AD is associated with multiple triggers and mechanisms; thus, the treatment of AD is complex, and many drugs and therapeutic targets are given. The main current strategies to treating AD are daily skincare used to moisturize and improve the cutaneous barrier dysfunction and medical treatments taken to control the itching and inflammation. However, it is hard to keep AD patients in remission. Recently systemic treatments, such as Janus kinase inhibitors and interleukin receptor inhibitors, have proven efficacious in AD. The aim of this Special Issue is to provide a comprehensive overview of advances in the diagnosis and treatment of AD, with particular interest on the use of innovative techniques and technologies in interventional therapies. Therefore, researchers in the field of AD are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
