Autoimmune Connective Tissue Diseases: Pathogenesis and Treatment

Message from the Guest Editor

Autoimmune connective tissue diseases (ACTDs) are a heterogeneous group of chronic immune-mediated inflammatory disorders, primarily affecting connective tissues and clinically characterized by variable multisystem manifestations, frequently overlapping. The causes and molecular mechanisms underlying the onset of ACTDs have not yet been fully understood. Although recent advances in understanding pathogenesis have led to major advances in targeted therapy, they still remain incurable. Novel biologic drugs, cell therapy and hematopoietic stem cell transplantation have generated real hope for the development of future treatments. The aim of this Special Issue is to highlight recent advances in the context of the pathogenesis and treatment of autoimmune connective tissue diseases. **Relevant topics include:**

- The molecular mechanisms underlying the onset of ACTDs
- The role of genetics and epigenetics in the development of ACTDs
- Differential diagnostic approaches
- The evaluation of biomarkers for diagnosis, prognosis and drug response
- Novel therapy for ACTDs

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
